

Statement

Efficacy of ARQUAD® 2.10-50 versus influenza virus H1N1 (Swine Flu, Mexican flu)

The efficacy of ARQUAD® 2.10-50 was tested in a suspension test following to the European standard DIN EN 14476:2005-08 under clean conditions (0,03% BSA).

ARQUAD® 2.10-50 was tested as a 250 ppm, 125 ppm, and 62.5 ppm solution.
The exposure times were 1 min, 5 min, 10 min and 15 min.

Conclusion: 250 ppm concentration of ARQUAD® 2.10-50 (= 125 ppm active substance) is effective against influenza virus A/H1N1/X-179A at room temperature under clean conditions within an application time of 5 minutes.
